The right risk
The institutional investor perspective

Sandra Alzetta
Chief Product and Marketing Officer
Koine
From crash to crypto

The problem child of a troubled financial decade
Exponential growth
Massive volatility
A retail market

- 2008: whitepaper
- 2009: first Bitcoin
- 2011: rival cryptocurrencies
- 2016: smart contracts
- 2017: ICO
- 2018/9: new asset class

- 2008/9: new asset class
Institutions put their toes into the digital water
There's an inescapable pull to emerging asset classes

High volatility can mean attractive returns

Institutions are having to find best practice workarounds
This asset class is not (yet) institution grade

Regulation, regulation, regulation

Investor protection • Stability
Rule of law
The oversight oversight

Governance • Audit • Risk • Transparency
Being certain of settlement certainty

Certainty of counterparty • Certainty of settlement • Certainty of speed
Custody: the weakest link

Segregation of duties • The three rules of custody

Liquidity is the lifeblood of markets
Asset prices have to fluctuate – otherwise there’s no market

There are many exchanges; their liquidity differs

36% of traders upset with the problem of liquidity on prevailing exchanges*

*Cryptocurrency Exchange Encrybit survey
Introducing
Koine combine traditional financial discipline and rigour with digital agility
Institutional grade custody and settlement for fiat and digital assets

Suitable for high frequency trading across multiple marketplaces

Unparalleled speed
The right risk...
The right risk... 

...is no risk*

*apart from the trading risk you choose to take
• Managing out the risk of digital asset custody

• Maximising client protection from counterparty, settlement and insolvency risks

• Conforming to the highest standards in KYC and AML

• Banking grade governance model, full transparency
Symbiotic partnerships, driving liquidity
